Terminal Quantity:

2

Terminal Type:

Connector

Overall Length:

1.120 inches

Mounting Method:

Bracket

Capacitance Value:

0.25 microfarads

Capacitance Tolerance In Percent:

-20.0/+20.0

Component Quantity:

3

Mounting Configuration:

Bracket mtd. With a 0.200 in. Wide slot, 0.480 in. Lg

Component Controlling Agency:

General motors corporation

Component Name:

Capacitor assembly

Component Identifying Number:

15599222 drawing no.

Electrical Connection Method:

Parallel

Component Relationship:

Not matched

Working Voltage Rating:

50.0 volts

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T172-f
