Terminal Quantity:

9

Terminal Type:

Threaded stud

Mounting Method:

Holes

Capacitance Value:

50.0 microfarads

Capacitance Tolerance In Percent:

-10.0 to 10.0

Component Quantity:

8

Mounting Configuration:

Four 0.281 in. Diameter mtg holes spaced 5.125 in. By 13.875 in. C to c

Component Controlling Agency:

Cornell dubilier electronics

Component Name:

Capacitor, fixed paper

Component Identifying Number:

Kbsf44+506q+1 part no.

Component Relationship:

Matched for resultant resistance

Working Voltage Rating:

440.0 volts

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T172-f
