Terminal Quantity:

6

Terminal Type:

Wire lead

Mounting Method:

Terminal

Capacitance Value:

1.0 microfarads

Capacitance Tolerance In Percent:

-10.0/+10.0

Component Quantity:

3

Component Name:

Fixed metallized plastic capacitor

Component Relationship:

Matched to each other

Working Voltage Rating:

400.0 volts

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T172-f
