Terminal Quantity:

4

Terminal Type:

Wire lead

Mounting Method:

Terminal

Capacitance Value:

1.0 microfarads

Capacitance Tolerance In Percent:

-10.0/+10.0

Component Quantity:

2

Component Name:

Capacitor fixed plastic

Electrical Connection Method:

Parallel

Component Relationship:

Matched to each other

Working Voltage Rating:

400.0 volts

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T172-f
