Terminal Quantity:

3

Terminal Type:

Wire lead w/lug

Mounting Method:

Terminal

Capacitance Value:

0.15 microfarads

Capacitance Tolerance In Percent:

-10.0/+10.0

Component Quantity:

2

Component Controlling Agency:

Strategic systems project office

Component Name:

Capacitor, fixed, plastic

Component Identifying Number:

3224669 drawing no.

Component Relationship:

Not matched

Working Voltage Rating:

400.0 volts

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T172-f
