Capacitive Electrode Material:

Aluminum

Special Features:

Used on power supply battery mk 153 mod 1 f/mine mod 60. Each capacitor is shipped in a barrier bag per mil-b-131 and in a fiberboard box per mil-b-636. Bag is heat sealed. Capacitor will have polarized polarity. Rated voltage: is vdc forward and 1.5 vdc reverse bias. Surge voltage: 20 voltsmax. Operating life: 8760 hours at rated voltage non-operating storage: ten years w/storage temperature not to exceed 40 degrees centigrade

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A010b0
