Terminal Quantity:

6

Terminal Type:

Printed circuit

Mounting Method:

Terminal

Capacitance Value:

1200.0 microfarads

Capacitance Tolerance In Percent:

-10.0/+75.0

Component Quantity:

2

Component Controlling Agency:

Transistor devices, inc.

Component Name:

Capacitor, fixed, electrolytic

Component Identifying Number:

35080 drawing no.

Component Relationship:

Matched to each other

Working Voltage Rating:

50.0 volts

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T172-f
