Terminal Quantity:

1

Terminal Type:

Wire lead w/lug

Capacitance Value:

0.033 microfarads

Capacitance Tolerance In Percent:

-10.0/+10.0

Component Quantity:

3

Component Controlling Agency:

Litton system inc.

Component Name:

Housing assembly capacitors

Component Identifying Number:

66910650-9 drawing no.

Electrical Connection Method:

Parallel

Component Relationship:

Matched to each other

Working Voltage Rating:

2000.0 volts

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T172-f
