Terminal Quantity:

16

Terminal Type:

Wire lead

Mounting Method:

Plate

Capacitance Value:

176.0 microfarads

Capacitance Tolerance In Percent:

-10.0/+10.0

Component Quantity:

8

Mounting Configuration:

Eight machine flat head screws with four on opposite sides

Component Controlling Agency:

Arg0 systems inc

Component Name:

Capacitor, fixed, electrolytic

Component Identifying Number:

4000-02351 drawing no.

Electrical Connection Method:

Series

Component Relationship:

Matched to each other

Working Voltage Rating:

50.0 volts

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T172-f
