Terminal Quantity:

30

Terminal Type:

Screw

Mounting Method:

Terminal

Capacitance Value:

4200.0 microfarads

Capacitance Tolerance In Percent:

-10.0/+50.0

Component Quantity:

15

Component Controlling Agency:

Northrop grumman corporation

Component Name:

Capacitor, fixed, electrolytic

Component Identifying Number:

6109d81g01 drawing no.

Component Relationship:

Matched to each other

Working Voltage Rating:

300.0 volts

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T172-f
