Terminal Quantity:

12

Terminal Type:

Wire lead

Mounting Method:

Terminal

Capacitance Value:

47.0 microfarads

Capacitance Tolerance In Percent:

-10.0/+10.0

Component Quantity:

6

Component Controlling Agency:

Honeywell, inc.

Component Name:

Fixed, electrolytic, capacitor

Component Identifying Number:

8520275 drawing no.

Component Relationship:

Matched to each other

Working Voltage Rating:

35.0 volts

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T172-f
