| Overall Length:                                      |
|--|
| 1.100 inches   |
| Mounting Method:                                     |
| Any acceptable                                       |
| End Application:                                     |
| Aircraft e/i fscm 89954                              |
| Component Quantity:                                  |
| 3  |
| Component Name:                                      |
| Capacitor assembly                                   |
| Component Relationship:                              |
| Matched to each other                                |
| Special Features:                                    |
| Made from a total of 3 mil-c-39003/9-2021 capacitors |
| Shelf Life:  |
| N/a  |
| Unit Of Measure:                                     |
|  |
| Demilitarization:                                    |
| No   |
| Fiig:  |
| T172-f   |
|  |
