End Application:

State air cooled frequency converter part no. 700-34400

Special Features:

Dc capacitor bank module contains a bank of capacitors to filter the output of the recitfier modules and to provide stored energy for power interruptions up to 8 milliseconds; also contains dc sense circuitry to sense the level of dc voltage, dc bleeder circuit to discharge dc capacitors and sharing clamp electronics

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T172-f
