**End Application:**

Knolls atomic power lab - special project management system

**Capacitive Electrode Material:**

Aluminum

**Special Features:**

Is snap-in type. Operating temp is -40.0 to 105.0 degrees celcius. Working voltage is 160 to 450 volts dc. Life is 3, 000 hours at 105.0 degrees celcius. Has high ripple current capacity.

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A010b0
