End Application:

Knolls atomic power lab - special project management system

Capacitive Electrode Material:

Aluminum

Special Features:

Is snap-in type. Operating temp is -40.0 to 105.0 degrees celcius. Working voltage is 160 to 450 volts dc. Life is 3, 000 hours at 105.0 degrees celcius. Has high ripple current capacity.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:
