Product Name:

Capacitor, electrolytic, standard

Special Features:

Capacitance: 470yf; current, ripple: 430ma; material, element: aluminum electrolytic; termination: radial; voltage rating: 50vdc; temp range: -55 degrees to +105 degrees c; working voltage: 6.3 to 450 vdc; load life: 2000 hrs

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A010b0
