Terminal Type:

Wire lead

Board Material:

Aluminum

Length:

1.50 inches

Mounting Method:

Tab

Capacitance Tolerance In Percent:

-20.0 to 20.0

Working Voltage Rating:

200.0 volts

Unpackaged Unit Weight:

30.0 grams

Product Name:

Type mlp 85 (degrees / celsius) flatpack, ultra long life, aluminum electrolytic

Special Features:

Temperature range = minus 55 to positive 85 degrees celsius

Special Test Features:

Terminals = 18 awg copper wire with 60/40 tin-lead electroplate, 20 amps max

Supplementary Features:

Bare can insulation

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T172-f
