Body Style:	
Chip type	
Reliability Indicato	r:
Not established	
Body Length:	
0.500 inches	
Body Width:	
1.000 inches	
Body Height:	
0.500 inches	
Schematic Diagran	n Designator:
No common or grou	nded electrode (s)
End Application:	
5865-01-567-8646;	countermeasures set
Capacitance Value	Per Section:
18.0 picofarads sing	le section
Nonderated Operat	ling Temp:
Between -55.0% de	grees celsius and 125.0 degrees celsius
Nonderated Contin	uous Voltage Rating And Type Per Section:
50.0 dc single sectio	n
Tolerance Range P	Per Section:
+0.0 to 5.0 percent s	single section
Case Material:	
Ceramic	
Dissipation Factor	At Reference Tempurature In Percent:
0.1	
Product Name:	
Smd, fixed, temper	ature compensating, class 1
Special Features:	
Kemet 50v rated par	rts may be operated at 63 volts; chip size, 0402; temperature coefficient, cog; termination type, tin; insulation
resistance, 100 goh	im; dielectric strength, 125v
Terminal Type And	Quantity:
2 bonding pad	
Shelf Life:	
N/a	
Unit Of Measure:	
Demilitarization:	
No	
Fiig:	
A010b0
