Overall Length:

17.250 inches

Overall Height:

7.000 inches

Overall Width:

15.750 inches

End Application:

General purpose test equipment

Special Features:

Frequency range 110 mhz to 1 ghz; tech order 33a1-12-834-1; weight 20.250 lbs; maximum input power 10 watts avg and 200 watts peak; impedance input and output 50 ohms; connectors type n female coaxial; pass band each unit dc to 1 ghz; spurious response 18 db max; similar but not interchangeable with nsns 5915-00-894-2802, 5915-00-965-8409, 5915-00-965-8413, and 5915-00-965-8422; rejection at notch center 80 db min and 100 to 120 db typical; pass bank insertion loss 6 db maximum and 3 db typical

Functional Description:

Bridged-t notch filter; unit is primarily intended for use with radio receivers or tunable voltmeters to allow the use of their full sensitivity in the presence of a strong undesired signal; where several undesired signals of high amplitude are present, the filter may be connected in tandem to reduce them to desirable levels

Supplementary Features:

Manufacturers name: filter, tunable rejection

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A047b0
