Overall Length:

4.187 inches

Body Length:

3.500 inches

Body Width:

2.065 inches

Body Height:

1.900 inches

Reference Frequency Per Function:

3.455 kilohertz blank

Source Impedance Rating Per Function:

2.0 kilohms blank

Inclosure Type:

Encased

Insertion Loss At Reference Frequency Per Function In Decibels:

6.0 blank

Functional Terminal Type And Quantity:

1 component socket output 2nd function

Frequency Band Width Per Function:

3.385 kilohertz blank

Style Designator:

Rectangular terminal/terminals on opposite surfaces

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A047b0
