Special Features:

50 ohms impedance, inductance, capacitance-resistance type circuitry; 3 wire lead type terminals input; 3 erie filters part no.1203-065 at input end, 1 connector receptacle type terminal output; amphenol part no.126-216; metal case; 2 guide pins at output end of filter, 5.562 in.Lg o/a; 1.750 in.W; 1.000 in.H;

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A507h0
