Overall Length:

2.000 inches

Principal Circuitry Type Per Function:

Electromechanical blank

Inclosure Type:

Encased

Mounting Facility Type And Quantity:

2 flange

Insertion Loss At Reference Frequency Per Function In Decibels:

3.0 blank

Functional Terminal Type And Quantity:

1 rectangular flange output 2nd function

Body Material:

Metal

Body Surface Treatment:

Silver

Style Designator:

Rectangular terminal/terminals on opposite surfaces

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A047b0
