**General Description:**

Metal; encapsulated; 40 volts dc operating voltage; two input leads; 2 output leads; one test point lead; three optional leads; four board positioners; eight capacitors; three diodes; six resistors; one transistor; 2.000 in. Lg; 1.000 in. W; 0.785 in. H

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A23900
