Filter Assembly Electrical - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/5915-01-072-4312

General Description:

An 'l' type filter consisting of a feed-thru capacitor and a tiroid coil is used for the 400 hz, single phase ac lines. An 'l' type emi filter, ceramic type, is used for the 28 vdc input power leads. The filter assembly precludes electromagnetic interference from entering or emanating from the equipment. All components are contained in a housing constructed from aluminum alloy
