Overall Height:

0.620 inches

Body Length:

0.335 inches

Body Width:

0.110 inches

Body Height:

0.370 inches

End Application:

Navigation set, radio an/srn-19

Reference Frequency Per Function:

500.0 kilohertz blank

Source Impedance Rating Per Function:

50.0 ohms blank

Load Impedance Per Function:

50.0 ohms blank

Inclosure Type:

Encased

Mounting Facility Type And Quantity:

2 terminal

Insertion Loss At Reference Frequency Per Function In Decibels:

3.0 blank

Functional Terminal Type And Quantity:

1 pin output 2nd function

Frequency Band Width Per Function:

498.00 kilohertz blank and 502.00 kilohertz blank

Style Designator:

Rectangular terminal/terminals on one surface

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A047b0
