End Application:

Oe273vurn

Source Impedance Rating Per Function:

50.0 ohms 4th radio interference

Load Impedance Per Function:

50.0 ohms 5th radio interference

Inclosure Type:

Encased

Functional Terminal Type And Quantity:

5 tab, solder lug output 2nd function

Operating Voltage Rating And Type Per Function:

115.0 volts ac 5th radio interference 5th function

Body Material:

Metal

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A047b0
