Overall Length:

1.900 inches

Body Length:

1.786 inches

Reference Frequency Per Function:

50.0 megahertz blank

Inclosure Type:

Encased

Width Across Flats:

0.500 inches

Insertion Loss At Reference Frequency Per Function In Decibels:

25.0 blank

Functional Terminal Type And Quantity:

1 pin input 1st function and 1 pin output 1st function

Special Features:

Xcase finish is silverplating; terminals are solderable; dc current: 25ampsdc; weight: 10.5; nut material: free machining brass; washer material: phospher bronze; thermal shock voltage conditioning 100 hours, 2x rated voltage at maximum rated temp

Style Designator:

Round terminal/terminals on opposite surfaces

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A047b0
