End Application:

0n410814-1

Source Impedance Rating Per Function:

50.0 ohms blank

Load Impedance Per Function:

50.0 ohms blank

Principal Circuitry Type Per Function:

Inductance-capacitance blank

Average Power Rating Per Function:

750.0 watts blank

Inclosure Type:

Encased

Mounting Facility Type And Quantity:

2 terminal

Functional Terminal Type And Quantity:

1 wire lead output 2nd function

Body Material:

Metal

Special Features:

Lead supplied with connector

Style Designator:

Rectangular terminal/terminals on opposite surfaces

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A047b0
