Overall Length:

3.114 inches

Body Length:

2.380 inches

Body Width:

0.750 inches

Body Height:

1.000 inches

Reference Frequency Per Function:

500.0 megahertz blank

Source Impedance Rating Per Function:

50.0 ohms blank

Load Impedance Per Function:

50.0 ohms blank

Voltage Standing Wave Ratio Per Function:

1.5 blank

Inclosure Type:

Encased

Mounting Facility Type And Quantity:

2 terminal

Functional Terminal Type And Quantity:

2 connector, receptacle input-output

Style Designator:

Rectangular terminal/terminals on opposite surfaces

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A047b0
