Filter Quantity:

2

End Application:

Laser maverick agm65e

Filter Type:

Radio interference

Special Features:

Contains 2 pi type filters; assembly is intended for use in the suppression of broadband emi; operating temp -55c degrees to +125c deg; voltage is 125 vdc over operating temp range; current is 15 amp (load current); dc resistance not greater than .002 ohm; capacitance not less than 4000 picofarads; weight 80.0 grams

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A507h0
