Overall Height:

1.770 inches

Body Length:

9.000 inches

Body Width:

3.490 inches

Unthreaded Mounting Hole Diameter:

0.155 inches

Operating Temperature Range:

-54.0/+65.0 degrees celsius

End Application:

An/tyq-2 (v)1(v) 2

Reference Frequency Per Function:

30.0 megahertz blank

Source Impedance Rating Per Function:

50.0 ohms blank

Load Impedance Per Function:

50.0 ohms blank

Inclosure Type:

Encased

Mounting Facility Type And Quantity:

4 unthreaded hole

Features Provided:

Moisture resistant and fungus resistant and shock resistant

Insertion Loss At Reference Frequency Per Function In Decibels:

0.6 blank

Functional Terminal Type And Quantity:

1 connector, receptacle input and 1 connector, receptacle output

Frequency Band Width Per Function:

30.00 megahertz blank and 87.97 megahertz blank

Special Features:

Aluminum alloy finish; color green

Style Designator:

Rectangular terminal/terminals on opposite surfaces

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A047b0
