Overall Length:

2.760 inches

Overall Height:

0.400 inches

Body Length:

2.000 inches

Body Width:

0.600 inches

Operating Temperature Range:

-0.0/+77.0 degrees celsius

End Application:

An/gpn-22&gpn

Reference Frequency Per Function:

8508.0 megahertz blank

Source Impedance Rating Per Function:

50.0 ohms blank

Load Impedance Per Function:

50.0 megohms blank

Voltage Standing Wave Ratio Per Function:

1.5 blank

Inclosure Type:

Encased

Mounting Facility Type And Quantity:

2 connector

Insertion Loss At Reference Frequency Per Function In Decibels:

1.5 blank

Functional Terminal Type And Quantity:

1 connector, receptacle input and 1 connector, receptacle output

Specified Frequencies Of Discrimination Per Function:

8016.00 megahertz blank and 9000.00 megahertz blank

Frequency Band Width Per Function:

8408.00 megahertz blank and 8608.00 megahertz blank

Discrimination At Specificationified Frequencies Per Function In Decibels:

50.0 blank

Special Features:

I/o sma female

Style Designator:

Rectangular terminal/terminals on opposite surfaces

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A047b0
