Operating Temperature Range:

-55.0/+85.0 degrees celsius

Reference Frequency Per Function:

132.1508 megahertz blank

Source Impedance Rating Per Function:

50.0 ohms blank

Load Impedance Per Function:

50.0 ohms blank

Principal Circuitry Type Per Function:

Crystal blank

Inclosure Type:

Hermetically sealed

Insertion Loss At Reference Frequency Per Function In Decibels:

3.0 blank

Body Material:

Metal

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A047b0
