Body Length:

1.500 inches

Body Width:

0.800 inches

Body Height:

0.600 inches

Vibration Resistance Range In Hertz:

+5.0/+1000.0

Operating Temperature Range:

-40.0/+85.0 degrees celsius

Reference Frequency Per Function:

67.5 megahertz blank

Source Impedance Rating Per Function:

50.0 ohms blank

Load Impedance Per Function:

50.0 ohms blank

Voltage Standing Wave Ratio Per Function:

1.5 blank

Average Power Rating Per Function:

1.0 watts blank

Inclosure Type:

Encased

Mounting Facility Type And Quantity:

4 threaded hole

Functional Terminal Type And Quantity:

1 connector, receptacle input and 1 connector, receptacle output

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A047b0
