Body Height:

0.045 inches

Vibration Resistance Range In Hertz:

+10.0/+2000.0

End Application:

1520-01-106-9519, helicopter, attack. Weapon system: helicopter, apache ah-64.

Inclosure Type:

Encapsulated

Operating Voltage Rating And Type Per Function:

50.0 volts dc blank

Product Name:

Filter disc

Special Features:

Designed to install in an ms27466t25b35px receptacle, with x being the keying code. Rotation angle: 121 degrees. One extraction tape is provided with each filter.

Style Designator:

Round terminal/terminals on one surface

Supplementary Features:

Material: silicone elastomer

Test Data Document:

96906-1344a standard (includes industry or association standards, individual manufactureer standards, etc.). And 96906-5400 standard (includes industry or association standards, individual manufactureer standards, etc.).

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A047b0
