**Overall Height:**

15.800 inches

**Overall Width:**

5.100 inches

**Filter Type:**

Radio interference

**Special Features:**

Tunable cavity rejection filter operating from 6.5 to 10.0 ghz and used to perform specification compliance testing as stated in mil-std-462, rejection 50 db min @ tuned freq 80 db typical, insertion loss, 5 db max, impedance designed for 50 ohm system

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A507h0
