Overall Height:

25.750 inches

Overall Width:

8.000 inches

Filter Type:

Radio interference

Special Features:

9tunable cavity rejection filter operating from 3.0 to 6.5 ghz and used to perform specification compliance testing as stated in mil-std-462, rejection 50 db min @ tuned freq 80 db typical, insertion loss, 5 db max, impedance designed for 50 ohm system

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A507h0
