**Overall Height:**

25.750 inches

**Overall Width:**

8.000 inches

**Filter Type:**

Radio interference

**Special Features:**

9tunable cavity rejection filter operating from 3.0 to 6.5 ghz and used to perform specification compliance testing as stated in mil-std-462, rejection 50 db min @ tuned freq 80 db typical, insertion loss, 5 db max, impedance designed for 50 ohm system

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A507h0
