Hazardous Locations/environmental Protection:

Shock proof

Overall Depth:

4.250 inches

Center To Center Distance Between Mounting Facilities Parallel To Width:

8.500 inches

Overall Height:

14.160 inches

Overall Width:

10.160 inches

Unthreaded Mounting Hole Diameter:

0.500 inches

Standard Mounting Pattern Designator:

6 point-rectangular

Fuse Current Rating In Amps:

10.0

Mounting Method:

Unthreaded hole

First Center To Center Distance Between Mounting Facilities Parallel To The Height:

5.000 inches

Second Center To Center Distance Between Mounting Facilities Parallel To The Height:

5.000 inches

Main Line Maximum Ac Voltage Rating In Volts:

125.0

Fuse Type And Quantity Accommodated:

4 cartridge ferrule

Special Features:

4 circuits; 4 midget fuses

Functional Description:

Shipboard power distribution

Material:

Copper alloy

Style Designator:

Rectangular, surface mounting

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A17600
