Terminal Quantity:

2

Terminal Type:

Wire lead

Overall Length:

2.800 inches

Overall Height:

0.200 inches

Overall Width:

1.400 inches

Current Type:

Dc

Mounting Method:

Holes

Mounting Configuration:

Two 0.112 in. Diameter mounting holes centered 2.400 in. Apart along the length and 0.900 in. Apart along the width

Polarization Feature:

Included

Current Interrupting Capacity:

80.0 amperes

Shunt Capacitor:

Included

Element Material:

Any acceptable

Absorber Current Rating:

8.000 amperes

Protected Item Name:

Power supply

Voltage In Volts:

6.0 and 30.0

Special Features:

Provides means to adjust voltage clockwise to 6.5 volts; counterclockwise to 35 volts to avoid damage to power supply

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T214-a
