Terminal Quantity:

1 and 1

Terminal Type:

Screw and solderless lug

Overall Length:

2.750 inches

Overall Height:

1.950 inches

Overall Width:

0.375 inches

Current Type:

Dc

Mounting Method:

Holes and terminal

End Application:

Instrument landing system (ils)

Mounting Configuration:

Two 0.140 in diameter holes spaced 0.800 in ctoc inline with solder lug

Polarization Feature:

Included

Shunt Capacitor:

Not included

Element Material:

Plastic, phenolic

Protected Item Name:

Printed circuit boards

Voltage In Volts:

28.0

Special Features:

Function, lightning protection circuit assembly; reference data, ti-6750.115, mark 1d, ils, sec 1-12, pg 10-2

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T214-a
