Terminal Quantity:

1 and 1

Terminal Type:

Screw and solderless lug

Overall Length:

2.750 inches

Overall Height:

1.950 inches

Overall Width:

0.375 inches

Current Type:

Ac and dc

Mounting Method:

Holes and terminal

End Application:

Instrument landing system (ils)

Mounting Configuration:

Two 0.140 in diameter holes spaced 8.000 in ctoc inline with terminal

Polarization Feature:

Not included

Shunt Capacitor:

Not included

Element Material:

Plastic, phenolic

Protected Item Name:

Printed circuit board

Voltage In Volts:

5.0 and 0.1

Special Features:

Function, lightning protection circuit assembly; reference data, e-13thru-20, ti-6750.115 mark 1d ils, sec 1-12, pg 10-2

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T214-a
