Body Material:

Metal and glass

Terminal Quantity:

2

Terminal Type:

Wire lead

Overall Length:

0.950 inches

Overall Diameter:

0.165 inches

Mounting Method:

Terminals, wire lead

Usage Design:

Indoor and outdoor

Mounting Configuration:

Two leads 1.500 in. Min length 0.020 in. Diameter radially located 0.575 in. Min to 0.605 in. Maximum apart along length of case

Arrester Type:

Any acceptable

Breakdown Voltage:

Between 550.000 volts and 725.000 volts

Special Features:

Case and terminals are hermetically sealed; terminals are solid copper wire and shall be hit tin or hot solder coated

Precious Material And Location:

Case surface silver

Precious Material:

Silver

Supplementary Features:

Capacitance less than 5 pf; insulation resistance 100 megohms min at 100 volts dc; operating temperature range minus 65 degrees celcius to plus 85 degrees celcius

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T214-c
