Body Material:

Ceramic or metal

Terminal Quantity:

2

Terminal Type:

Wire lead

Overall Length:

Between 1.000 inches and 1.250 inches

Overall Diameter:

Between 0.370 inches and 0.380 inches

Mounting Method:

Wire lead

Usage Design:

Indoor

Mounting Configuration:

One wire lead at each end

Arrester Type:

Resistor

Breakdown Voltage:

605.000 volts

Special Features:

Hermetically sealed epoxy case; leads are no. 22 awg silver plated wire insulated with polytetrafluoroethylene

Special Test Features:

Selected and tested for e-3a aircraft

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T214-c
