Terminal Quantity:

1 and 1

Terminal Type:

Solder lug and threaded stud

Overall Length:

1.703 inches

Current Type:

Dc

Covering Material:

Plastic, epoxy resin

Overall Diameter:

Between 0.550 inches and 0.560 inches

Mounting Method:

Terminal

Mounting Configuration:

One solder lug a/a length and one thd stud 0.422 in. Min 0.453 in. Maximum long with 0.250-28 unf-2a thds; terminals are axially located

Polarization Feature:

Included

Current Rating In Amps:

35.0

Inclosure Feature:

High shock proof and humidity proof and salt air proof

Protective Covering Type:

Coating

Shunt Capacitor:

Not included

Element Material:

Any acceptable

Voltage In Volts:

43.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T214-a
