NSN 5920-01-258-3398

Cartridge Fuse - Page 1 of 1 View Online at https://aerobasegroup.com/nsn/5920-01-258-3398 **Body Style:** Tangent terminal type **Terminal Material:** Copper **Terminal Surface Treatment:** Solder dip **Overall Length:** 1.750 inches **Center To Center Distance Between Mounting Facilities Parallel To Length:** 1.000 inches **Overall Width:** 1.344 inches **Mounting Slot Width:** 0.260 inches **Overall Diameter:** 0.812 inches **Case Material:** Fiber **Continuous Current Rating In Amps:** 30.000 **Fragility Factor:** Moderately rugged **Terminal Thickness:** 0.047 inches **Maximum Voltage Rating In Volts:** 32.0 dc **Circuit Over-current Interruption Type:** Normal instantaneous **Interruption Indicator Method:** Opaque body

Features Provided: Nonrenewable fusible element **Short-circuit/interrupt Current Rating In Amps:** 200000.0 Shelf Life: N/a **Unit Of Measure: Demilitarization:**

No
