Overall Length:

11.500 inches

Overall Height:

6.290 inches

Overall Width:

6.580 inches

Current Type:

Ac

Usage Design:

To protect loads federal from distribution panels, branch panels and or critical load centers aboard ship or shore based power distribution systems.

Voltage In Volts:

480.0

Special Features:

Item is single port, class b, type 1, parallel connected transient voltage surge suppressorutilizing hybrid circuitry with 80 ka per mode and 240 ka per phase peak surgecurrent

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T214-a
