End Application:

Digital terminal radar airport surveillance radar (asr11)

Special Features:

Surge protection device; voltage 120v/208v three phase wye; maximum continuous operating voltage 150v; discharge current 20ka; voltage protection rating l-g, n-g, 700v, l-l, l-n 1200v; maximum surge current 140ka; maximum lightening current 7.5ka; response time [1ns; stainless steel nema 4x; 12"x12"x8"; long duration surge perform 2ms 500a 250hits. This is a form-fit-function alternative for existing nsn 5920-01-513-4576 which is corroding badly at sites with salt air exposure. This item includes a stainless-steel enclosure and is intended as a suitable alternative for corrosive environments

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T214-a
