Overall Length:

21.125 inches

Overall Height:

33.562 inches

Overall Width:

15.000 inches

Case Material:

Metal

Pole Quantity:

3

Mounting Facility Type And Quantity:

3 threaded hole

Maximum Continuous Load Current Rating Per Pole:

60.0 amperes ac all locations

Operating Voltage Type And Rating Per Pole In Volts:

7500.0 ac all locations

Maximum Interrupting Capacity Current Type And Rating Per Pole In Amps:

12500.0 ac all locations

Circuit Protection Type:

Overcurrent all locations

Trip Release Method:

Magnetic all locations

Trip Release Characteristic:

Time delay all locations

Reset Method:

Automatic

Manual Actuator Type And Quantity:

1 toggle

Actuator Function:

Trip w/separate reset

Internal Trip Release Configuration:

Series trip all locations

Trip Delay Time In Seconds Per Rated Continuous Current:

0.230 at 400 pct all locations

Special Features:

Sub, book 72, gei 74928, sec 1-12, power control unit 1, constant current regulator substation, (moving coil type)

Frequency In Hertz:

60.0 all locations

Terminal Type And Quantity:

6 screw

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A030a0
