Body Style:

Rectangular dimensional envelope

Overall Length:

4.594 inches

Overall Height:

3.844 inches

Overall Width:

3.531 inches

Pole Quantity:

2

Mounting Facility Type And Quantity:

2 terminal

Maximum Continuous Load Current Rating Per Pole:

15.0 amperes dc all locations

Operating Voltage Type And Rating Per Pole In Volts:

250.0 dc all locations

Circuit Protection Type:

Overcurrent all locations

Trip Release Method:

Thermal all locations

Trip Release Characteristic:

Instantaneous all locations and time delay all locations

Ultimate Trip Rating Of Continuous Current Rating Per Pole In Percent:

150.0 all locations

Ultimate Trip Time Per Pole In Seconds:

3600.000 all locations

Internal Trip Release Configuration:

Series trip all locations

Trip Delay Time In Seconds Per Rated Continuous Current:

7.000 at 200 pct all locations and 25.000 at 200 pct all locations

Trip Release Ambient Temperature Rating:

50.0 degrees celsius all locations

Terminal Type And Quantity:

4 compression

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A030a0
